

Lumzeus®

Eos Ice Prime

A breakthrough hair removal platform

Accurate three-wavelength
For all skin types

Super Power

Big spot size
(15*30mm)

Eos Ice Prime

For all skin types

Eos Ice Prime uses 1500W high-power precision three-wavelength treatment technology. The light energy directly acts on the hair follicle tissue of the dermis. It removes the melanin from the hair follicle tissue without damaging normal skin and sweat glands, and achieve the purpose of ultra-fast and 100% painless hair removal.

A breakthrough hair removal platform that combines ultimate functionality with unparalleled comfort. Eos Ice Prime leverages the benefits of three combined wavelengths, with an Improved patient experience and a business-oriented approach. creating a unique and result driven new solution in the world of professional hair removal.

- ①Emit a laser beam. ②The laser beam is absorbed by hair follicle melanin. ③Different color hair has different ability to absorb light wave. ④After absorption, the laser energy will be converted into heat energy. ⑤Hair follicles and surrounding stem cells lose their activity effect and fall off. ⑥So reach hair removal effect.

1500w
Super high power

Simultaneous
contact cooling

Three waves diode laser
(755nm+808nm+1064nm)

Support 24 hours
continuous work

Eos Ice Prime

For all skin types

The most popular non-invasive treatment

- **Painless:** The unique epidermal protection mode can effectively protect the skin from damage, it is comfortable without burning and tingling.
- **Fast:** Change the treatment dead zone formed by the traditional laser circular spot, which can remove hair in a large area, with good effect and fast speed.
- **Safety:** Directly hit the melanin in the hair follicle, the epidermis absorbs less energy, does not damage the surrounding tissues, and has no inflammation and pigmentation.
- **Precise:** The light energy is directly absorbed by the melanin particles in the hair and hair follicles. The light and heat effect completely destroys the hair follicles and hair shafts, so as to effectively remove hair.

Handle and advantage

Ultra-light hand with light texture, the latest generation of laser technology. Fast treatment of large spots, treatment time and course reduction

- High-power 3 wavelengths to meet the needs of whole body hair removal
- High frequency, fast and smooth improvement of treatment efficiency
- Upgrade the cooling system to effectively ensure 24 hours non-stop

HANDLE

- SPOT SIZE:15mm*30mm

- The latest generation of laser technology, ultra Light, small and strong energy

755nm

808nm

1064nm

3 waves 755nm + Diode 808nm + 1064nm,
3 in 1 all skin type can be used
High power: NEW 1500W handle for options
Big spot size 15*30mm face & body hair removal
solution!

Why choose 1500W diode laser?

1500W diode laser from Eos Ice Prime stands for the highest technology in the hair removal industry, which can help you achieve super fast, permanent and 100% painless hair removal.

Eos Ice Prime

Intelligent parameter system

The professional data system automatically adjusts parameters according to different needs, different skin colors, genders, parts, and the color, thickness and area of the hair to achieve perfect control.

Application

Complete and effective solution for all skin tones, hair types and target areas(body&face)

Face: chin and lips, beard

Body: armpit, arms, leg hair, chest hair, bikini area
